The image shows a screenshot of a code editor, specifically Visual Studio Code, with a C++ file named `c++25.cpp` open. The code is as follows:

```
24
25 #include <iostream>
26 #include <algorithm>
27 using namespace std;
28
29 int main() {
30     string str1, str2;
31     cin >> str1 >> str2;
32
33     sort(str1.begin(), str1.end());
34     sort(str2.begin(), str2.end());
35
36     if (str1 == str2)
37         cout << "Anagram";
38     else
39         cout << "Not Anagram";
40
41     return 0;
42 }
```

The interface includes a sidebar on the left with icons for Explorer, Search, Source Control, Run and Debug, Extensions, Python, and Testing. The bottom panel shows the TERMINAL tab with the command prompt `PS C:\Users\Lenovo\Documents\C++\c++>`. The status bar at the bottom indicates the current line and column (Ln 42, Col 2), spaces (Spaces: 4), encoding (UTF-8), line endings (CRLF), and the active language (C++).
